E-learning

*Knowledge sharing
across the organisation*

efficient, educative, e-learning

What is e-learning?

Knowledge   Experience

E-learning

Digital learning/
education

E-learning advantages

Standardised learning process, delivery **consistency**

Customised and **specialised** subjects in a **interactive** format

Easy access to the LMS and you can easily **re-take** courses

**Improve** performance, **decrease** material costs

Sharp layout & **helpful functionality** ensure a pleasent user experience in both Danish and English

www.ce-tec.dk

A significant actor in the Danish energy sector is using e-learning material developed by Ce-Tec A/S for CMS PIMS training purposes (see image below):

- The course is in English (both written and voice-over)
- Integrated Danish translation functionality on each slide
- The course ends with a multiple-choice test

Examples of possible e-learning content

Procedures *Principles and how-to-read*	**Documentation** *How to do*	**Instrumentation, tubing & instruments** *How to do*
HSE *Introduction Refresher*	**Employee Handbook** *Basic company introduction*	**Software introduction** Technical tools Generel software

Design

There are almost endless design possibilities, such as:

- Customised content, visuals and even music.

- Multiple language options - written and voice-over.

- Interactive elements to improve user experience.

- Integration of videos.

- Optional multiple-choice tests.

- Your company logo on each slide.

Development

We can help you:

- Transform pre-existing education materials fx. PowerPoint presentations

  to top-of-the-art e-learning format.

- Develop customised courses from scratch.

- Update current e-learning course material.

Examples of cases:

Thermography course

HSE introduction

Software introduction
